RESTORE YOUR PEACE OF MIND

Fogging is the A VERY EFFECTIVE means of killing airborne viruses. Coronavirus can live for up to 3 hours in the air.

Our disinfectant is completely harmless to humans and pets– yet, it kills 99.99% of bacteria and viruses within 30 seconds.

30 minutes after completion the structure is safe to reinhabit and is left with a fresh smell.

OUR SAFE, EFFECTIVE DISINFECTING PROTOCOL:

1. Teams suit up in full PPE gear.
2. Wipe down high touch areas (doorknobs, keyboards, handles, faucets, etc.) with disinfectant that kills 99.99% of bacteria & viruses.
3. Clean horizontal surfaces for the fogger system to adhere.
4. Cover all smoke detectors.
5. Turn the HVAC system either off or down to avoid negative air pressure.
6. Fog interior of structure.
7. Remove smoke detector covers.
8. Turn the HVAC system back on or up.
9. Properly dispose of all cleaning materials.
